What's New in Version 4.5

Manual User Creation

Admin can manually create learner and teacher accounts

Group Classes

Create group classes and packages by admin

External Meeting

Teachers can manage external meeting links

Teacher Assignment

Admins assign teachers to learners based on learning preferences.

Homework Module

Homework assignment & submission within the lesson plan pop-up.

Parent Module

Parents can manage child accounts, book lessons and courses, and control child access & permissions. They can view bookings, orders, and reported issues. Children granted access get a limited dashboard to join sessions.

Google Calendar Sync

Manage Google Calendar sync and unsync settings.

User Management

Manual User Creation by Admin

This feature enables the Admin to manually create learner and teacher accounts through the admin panel. During registration, the admin must enter mandatory fields like Name, Phone Number, and Email ID. For learners, the admin can complete most of the account setup, while certain additional details are to be updated by the learners from their profile after login.

Learner Account Setup

Admin can complete most of the account setup for learners, with some details to be updated by learners after login.

Teacher Account Setup

Admin creates account with basic details only, remaining professional information has to be completed by teachers from dashboard.

Group Classes

Group Class and Group Class Package Creation by Admin/Sub-admin

This feature enables the Platform Admin or Sub-Admin to create group classes and group class packages on behalf of teachers through the admin panel. The admin will add the basic details and the Assigned Teacher for each group class or package. Once created, these classes or packages will be available for the learners to enrol.

Group Class Creation

Admin/Sub-Admin can create group classes with basic details and assign teachers for each class.

Package Creation

Create group class packages on behalf of teachers for learners to enrol.

Meeting Tools

External Meeting Tool Link

This feature allows teachers to manage their own external meeting links for sessions. The admin only needs to enable the external meeting tool setting. Once enabled, teachers can add an external meeting link in their profile settings, which can be used for all lessons and classes, or set different links for individual sessions.

Admin Configuration

Admin enables teachers to manage external meeting links.

Teacher Control

Teachers can add meeting links for all sessions or individual classes.

Global Links

Set one link for all the sessions from the account settings.

Session Specific Links

Different meeting links can be assigned to individual lessons or classes.

Child Account Management

Parent Module

The Parent Module allows parents to register, create and manage child accounts, and book lessons, classes, and courses on their behalf. Parents can control child access – including separate login and messaging permissions – and view child-specific details like bookings, orders, favourites, and reported issues. Children granted access will have a limited dashboard to view and join sessions.

Account Management

Parents can manage child accounts and book lessons on their behalf.

Access Control

Parents can control child access, including login & messaging permissions.

Child Monitoring

View child-specific details like bookings, orders, favourites, & reported issues.

Limited Dashboard

Children have a limited dashboard to view & join sessions if granted access.

Lesson Plan Updates

Homework Module

This feature enables teachers to assign homework, practice tasks, or learning assignments to students for their booked lessons or classes directly through the platform. Teachers can share instructions, reference materials, or task details within the lesson plan section, allowing students to clearly understand the requirements. Students can then upload and submit their completed work through the same lesson plan pop-up, making it easier for teachers to review submissions, track progress, and manage session-related assignments in one place.

Assignment Creation

Using lesson plan, teachers can create and assign homework to students for their booked sessions with clear instructions.

Student Submission

Students can submit completed work through the same lesson plan pop-up for teacher review.

Teacher Management

Teacher Assignment

This feature allows the admin to manually assign teachers to learners within the existing workflow. Admins can enable or disable this functionality and control whether the assigned teacher is visible in the frontend listings. Learners can submit an learning preferences, based on which the admin can assign suitable teachers on the platform. Once a teacher is assigned, the lesson booking process continues as per the platform's default system flow.

Manual Assignment

Admins can manually assign teachers to learners and control visibility in frontend listings.

Learning Preferences

Learners can submit their learning preferences for admin to assign suitable teachers.

Calendar Sync

Enhancement: Google Calendar Sync Updates

Admins can manage Google Calendar sync settings and enable or disable two-way syncing between Google and platform calendars. Teachers can also unsync their Google Calendars from their dashboards.

Admin Controls

Admins can manage sync settings and enable/disable two-way syncing between Google and platform calendars.

Teacher Controls

Teachers can unsync their Google Calendars directly from their dashboards for better control.
